## ABOUT CREHSS

Center for Research on Education, Health and Social Science (CREHSS) is an independent research organization aiming to serve in educational, health, and social science sectors and support professionals and researchers around the globe to enhance the research activities. Need-based appropriate policy contribute to the rapid development of the nation. There is a need to gather quality information on various public issues to develop a good policy. CREHSS aspires to offer various research and activities to promote research and development in partnership with government, NGOs and INGOs, community organizations, public agencies, and other foundations.

CREHSS was established in October 2018 AD with vision to contribute to the nation's holistic development through quality research outcomes. It is equipped with a group of young and dynamic educationists, health professionals, researchers, and academia with many years of research experience in Population, Education, Social Science, Public Health, Reproductive Health, Gender, and Development. CREHSS will contribute to improve the quality of life of the nation's citizens through the enhancement in policy on education and health based on research findings.

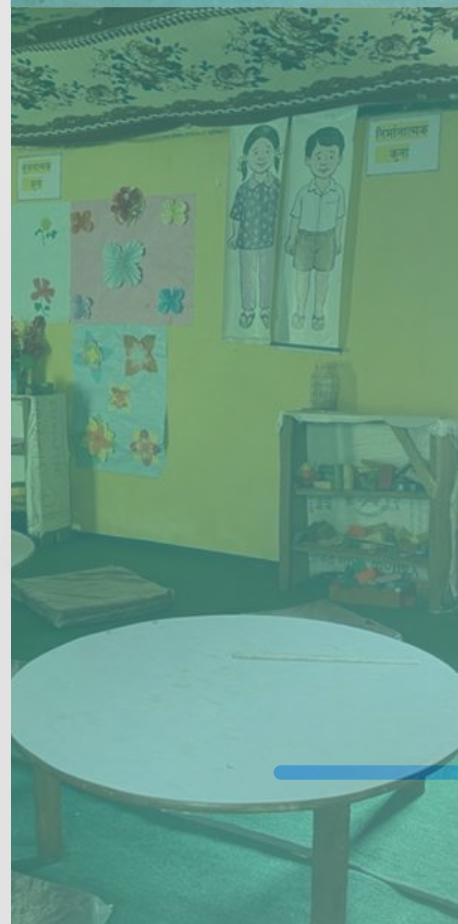

# WHY CREHSS

Many developing nations have failed to accelerate development due to defective policies and programs that could not address the real need of the target populations, resulting in millions of dollars going in vain. Policymakers and programmers need to have adequate practical evidence and information, knowledge, and skill about facts and figures to construct policies and decisions that could yield visible results. Studies also showed that there is a large gap between the research findings and policy decisions. Currently, developing countries like Nepal do not have adequate in-country expertise for policy research and analysis, creating demand for various policy researches/studies. There is a need to make some organizational effort to fulfill this gap. Therefore, CREHSS came into existence with intense enthusiasm and commitment to fulfill the gap to some extent.

CREHSS will support the government, NGOs/INGOs, communities, and individuals by providing concise policy-relevant practical evidence in firm of research findings and enhancing their technical capability in research and analysis.

# WORK EXPERIENCE

CREHSS demonstrates a track record of conducting high-quality quantitative and qualitative surveys covering all seven provinces and more than 60 districts of Nepal. CREHSS has successfully completed 95 research studies within seven years in collaboration with Federal and local government and financial support from different NGO/INGOs. The studies conducted by CREHSS belong to multidisciplinary field, mostly health, social science, education and livelihood. CREHSS has conducted different types of surveys (household level/community-based, health-facility-based, school-based), including baseline survey, mid-line survey, and evaluation studies.

CREHSS has accomplished four multi-countries studies supported by Save the Children (SCI) Nepal, World Vision International (WVI), Family Health International (FHI 360), Helen Keller International Nepal, International Development Enterprises (iDE) and Vitamin Angels .

## Working with/for

1. Action for Nepal
2. ADRA
3. ADRA/UNFPA
4. Caritas Spain/Caritas Nepal
5. CARE Nepal
6. CARE/USAID
7. Child Development Society
8. Dan Church Aid
9. FHI 360/USAID
10. Good Neighbors International Nepal
11. Helen Keller International
12. International Development Enterprises
13. International Nepal Fellowship
14. Lutheran World Relief

## VISION

To be a center of excellence in researching education, health, and social science-related issues for social transformation and development.

## MISSION

Engage in meaningful and responsive research in education, health, and social science that is committed to the nation's service and the global community.

Provide technical support in research and policy decisions by analyzing current policies, gaps, needs, and opportunities.

Develop and advocate appropriate and relevant policy at local, national, and international levels.

## OBJECTIVES

Support the government at all levels for the adoption of evidence-based policies by providing necessary analytical information and developing their capability in the public policy sphere.

1. Conduct high-quality research on education, health, and social science issues
2. Provide technical support in the areas of public policy decisions;

3. Enhance the capacity for policy analysis by providing training, organizing workshops, seminars, conferences, and public events to improve public policies.
4. Promote dialogue and cooperation among scholars, government officials, journalists, business leaders, NGO activists, and the general public.
5. Encourage and produce publications in education, health, and social science that could add value to public reforms.

## APPROACH

- Policy analysis - research/studies
- Capacity development for analysis and policy
- Consensus building to adopt appropriate policies
- Policy discussion forum
- Scientific paper publications
- Generate evidences from program development and adaptation

## EXPERTISE

- Quantitative research
- Qualitative research
- Mix-method
- Baseline, Midline, and Endline surveys
- Post Project Sustainability
- Analysis
- Project evaluation
- Gender Analysis and Audit
- Statistical analysis
- Policy analysis
- Health Research
- Education Research
- Population Research
- Social science Research
